PELES SÃO PREPARADAS
E MANIPULADAS PARA UM
PRODUTO FINAL DE TOPO

A Derma Leather, Com e Ind. de Peles, S.A. começou a sua atividade em 2003 sendo por isso uma empresa muito jovem, mas tem na sua origem o pai dos accionistas. Este iniciou a sua atividade em 1945 transmitindo a sua maturidade, sabedoria e conhecimentos que só um patriarca possui.

A sua atividade fabril centra-se no Processo de transformação do Couro a partir do Wet-Blue, tendo uma capacidade produtiva anual de 12 milhões de pés quadrados.

A modernização da empresa com investimentos a nível de produção e proteção ambiental, bem como a qualidade exigida aquando da aquisição da matéria-prima, são fatores que contribuem para a boa qualidade dos nossos artigos, procurando satisfazer, na totalidade, os nossos clientes.
