TOP END PRODUCT.

ABOUT THE COMPANY | HISTORY

Derma Leather, Com and Ind. De Peles, S.A. started its activity in 2003, being therefore a very young company, but has in its origin the father of the shareholders. It began its activity in 1945 conveying its maturity, wisdom and knowledge that only a patriarch possesses.

Its manufacturing activity focuses on the Leather Processing Process from the Wet-Blue, having an annual productive capacity of 12 million square feet.

The modernization of the company with investments in production and environmental protection, as well as the quality required when purchasing the raw material, are factors that contribute to the good quality of our articles, seeking our client's satisfaction.
